

**Digital Control Unit**

Temperature can be programmed between 0-100 °C with 3-digit LED display control unit

Electronic Float

It warns when water is insufficient and automatically deactivates the heater.

Durable Material

Made of 316 SS to prevent corrosion from 2% salty water

Bathmaks is a water tank with heating feature. The internal volume of the device, which is ergonomically designed on a laboratory scale, is 10 liters. The temperature of the salt water used in gluten washing should be between 22 °C \pm 2 in accordance with ICC Standards. If the water temperature is not at the specified levels, efficient gluten washing process cannot be performed. The Bathmaks device ensures that the water is at a constant temperature for the gluten washing process.
