

Dry Air Sterilizer (Oven) is designed for use in medical, research and industrial laboratories, sterilization and drying applications. Precise and constant temperatures are achieved thanks to the double-walled and fan circulation system controlled by the reliable and sensitive PID microprocessor control system.

- LCD display for easy use
- Used for drying and heating processes
- 55 and 120 liters of stainless steel internal volume
- Ambient temperature +5 °C to 250 °C operating temperature
- LED displays for setting temperature and time
- Programmable alarm limits and delayed start
- Additional safety with adjustable safety thermostat
