

Security

Door lock and sensor for user safety

Adjustable Motor Speed

Digitally adjustable motor speed from 1000 to 7000 rpm

ARM Processor

Display and control boards are powered by ARM technology

Power Supply (SMPS)

Protects the device against voltage changes between 100-240 V

Fault Detection System

Ability to control motors and sensors from the software

Gluten Index is a centrifuge device specially designed for the milling sector. In the device that rotates at 6000 rpm, gluten is passed through a metal sieve and gluten quality is determined. Santrimaks has a two-sample capacity and saves personnel costs and time. Santrimaks design was registered in the Turkish Patent Institute in 2017.

- 6000 rpm working speed in accordance with the standard
- High-resolution color touch screen
- User-friendly interface design
- Possibility to monitor analysis processes on the screen
- Warning the user with visual and audible warnings
- Working time adjustable from the screen (1 - 5 minutes)
